Madden 2024

- Rules - For each side of the ball, offense and defense, there is a cap of 12 AP. Within this AP limit, and following the standard in-game mechanics of earning available abilities, the user can choose what abilities their players will have.
- Abilities are chosen at the beginning of each season and can be changed freely at various points before the trade deadline (weeks 1, 5, & 9) by messaging a commissioner.
- Abilities/AP can only be changed via dev story or unlocking a new OVR threshold (85-90-95).
- If a new ability is earned, you may only change one other player to accommodate that AP into your 12.
- Player who earn abilities via dynamic development at the end of the season have an AP limit of 0 for the remainder of the season, including playoffs.
- Only abilities that cost 0 AP can be repeated on each side of the ball.
- Because QBs have additional slots and higher AP costs, SS QBs only count towards up to 6 AP and XF QBs only count towards up to 8 AP.
- If an XF QB also chooses an XF ability with an AP cost, this will be in addition to the cap of 8.
